Executive Summary

Consilience Systems LLC is a Decentralized Autonomous Corporation building the infrastructure for human sovereignty: AI platforms, blockchain identity, data sovereignty tools, and a self-sustaining internet network. Its primary consumer-facing product is the Society of Explorers — a philosophical membership community combining AI thinker conversations, a Great Books program, blockchain-based identity, and a physical space at 92B South St, Boston.

The enterprise operates through three entities: Consilience Systems LLC (technology/IP/infrastructure), Society of Explorers LLC (membership/brand/DAO operations), and SOE Nonprofit 501(c)(3) (education/grants/public benefit). All share common leadership and are headquartered at 92B South St.

Revenue Streams

Society of Explorers Membership (via Society of Explorers LLC)

Tiered DAO membership: \$10/mo (Digital), \$100/mo (Physical), \$1,000/mo (Patron), \$10,000 (Founding Lifetime). Includes AI thinker access, Great Books program, Salon, events, and governance rights proportional to tier.

Technology Licensing (via Consilience Systems LLC)

Consilience develops and licenses infrastructure: the thinker AI platform, Living Archive data sovereignty tools, TwiddleTwattle application, blockchain/NFT systems, and ExploreOS. Revenue from B2B licensing, API access, and enterprise deployments.

Merch, Artifacts, and Events

AI-generated merch via Printful. Artifact NFTs minted on Base. Founding dinners (\$499/seat). Public philosophy salons (\$25). Hacker house retreats.

Nonprofit Revenue (via SOE Nonprofit)

Grants, tax-deductible donations, educational program fees. Funds scholarships, free public salons, Living Archive public access, and curriculum development.

Growth Strategy

Phase 1 (Q2–Q3 2026): 10 founding members. Validate core experience. First founding dinner. Living Archive alpha.

Phase 2 (Q4 2026): 50+ members. Great Books cohort launches. Merch pipeline. TwiddleTwattle beta. Nonprofit formation.

Phase 3 (2027): 200+ members. Base mainnet NFT. ExploreOS alpha. Multi-site temple network. Enterprise licensing.

Phase 4 (2028+): Decentralized infrastructure at scale. pCell/pWave integration. Global node network. Full sovereign internet.
